San Bernardino Valley College
Aug 2020 - May 2022
GPA: 3.3

SKILLS

JavaScript
Python
Typescript
NodeJS
Windows
Git
React
HTML
Firebase

WORK EXPERIENCE

Software engineer intern

Merge

May 2022 - August 2022 / Remote

- Helped build out the beta and launch version of the Merge App for consumers
- Designed custom pages and routing for the mobile app using React
- Built out custom React animations for the companies website

PROJECTS

Promotional Snippet Generator

- Designed a website that hosts an API from Openai to produce branding snippets based on a single word
- Uploaded an API using FastAPI to AWS to make a Lambda function
- Utilized ReactJS and TailwindCSS to make a frontend

Netflix clone

- Utilized Firebase to setup the backend, database, and hosting of the application
- Built up the frontend with React and Tailwind CSS to give more in depth design
- Applied TMDB API to show new and popular movies on my application

Crypto trading platform webpage

(Frontend only)

- Utilized TailwindCSS to design a frontend for a Crypto Trading platform
- Designed this webpage to be completely useable on Mobile and desktop
- Used a unique React component to give the webpage an animated typing animation
